SUGGESTED USE: Stir 1/4 tsp. in water or juice, with or after meals.

“Ascorbic Acid is necessary for the formation of mature collagen, an enzyme cofactor in the metabolism of tyrosine and the synthesis of carnitine, norepinephrine and peptide hormones. Increases iron absorption from small intestines and is an anti-oxidant.” (Hirschmann, J.V. et al, 1999)

Ascorbic Acid recycles Vitamin E by relieving it of excess electrons, thereby rejuvenating Vitamin E’s antioxidant status.
